

Learning is a constant process, says Krish Ganesan

JC Nagar: "In order to provide a better chance for the engineering dropouts, several organisations, along with the government, are planning to provide livelihood jobs," said Krish Ganesan, Vice-President of Global Talent Acquisition at TCS.

He was speaking at the 3rd edition of Convergence 3i, organised by Sri Dharmasthala Manjunatheshwara Institute of Management Development and Confederation of Indian Industry (Mysore chapter) at the college premises on Tuesday.

In his keynote address, he said: "Students should not restrict themselves to the four walls of their

classrooms. Learning is a constant process and there is a need to meet the demands of the present world. Technology is growing rapidly and we need to adapt."

The inaugural programme was followed by relevant panel discussions and question-answer session moderated by SDMIMD students with panel members from both the corporate and academic areas.

Director of SDM-IMD Dr N R Parashuram, Chairman of CII Mysore chapter R C Jagadeesh, Director-HR of Safran Engineering Arun P Nair, convenor of Industry Institute Interaction panel, CII Mysore S V Venkatesh and many others were present.

There are five thousand engineering colleges in our country but their exposure to field work during academics is not up to the mark. TCS has launched world's largest campus commune portal where the discussions are held for improvement of knowledge. It includes students, faculty members and subject experts. The portal is now a hit and TCS is planning to expand it globally.
